PackJoyU

COMPANY INTRODUCTION

PACKAGING / PAPER / PRINT

ABOUT PACKJOYU

Our own factory. An integrated supply chain.

PackJoyU combines its own factory with an integrated supply chain to offer packaging, paper products and printed materials. Our capabilities bring together multi-category customization, design and sampling, and quality control.

A diverse product offering spans boxes, cups, molded pulp, print products and seasonal supplies.

Conceptual product illustrations

Capabilities that work together

Multi-category customization

We support customization across boxes, cups, printed materials and other product categories. A multi-category brief can bring different packaging and presentation needs into one project.

Design & sampling capability

Design and sampling support the development of product concepts. They create a practical stage for considering structure, appearance and presentation before moving into production.

Quality control

Quality control is part of our packaging, paper and print offering, alongside design, sampling and production coordination.

From concept to product

Design, sampling, production coordination and quality control form a connected set of capabilities.

Design → **Sampling** → **Production coordination** → **Quality control**

Product portfolio

12 CATEGORIES / 4 PRODUCT GROUPS

Boxes & Packaging
